PREMIUM

- Excellent Performance Calcium technology range
- Highest quality - World's best expanded grid metal technology
- Sealed closed type absolute maintenance free
- Highly durable with consistent starting performance
- Reliable starting even under extreme temperatures

PREMIUM HP

- High Performance Calcium technology range
- World's best expanded grid metal technology
- Sealed closed type maintenance free range
- Highly durable with consistent starting performance
- Especially oriented for high energy demand vehicles

PRESTIGE

- AGM VRLA Optimum performance MF battery
- Start / Stop cars highly recommended
- OEM Approved and Supplied
- Superb cranking power - Hermetically sealed
- Improve fuel efficiency - Eco friendly Save CO₂ emissions

STARTING BATTERIES

Start with a Winner

Europe's widest range of automotive batteries is suitable for every type of automobile including the most advanced cars and motorcycles, as well as for heavy vehicles and marine, solar, special and leisure uses. The Winner series, known for its superior performance, reliability and long life, meets every customer demand.

Turn to Advanced Technologies

The Winner automotive series represents an up-to-date technology in the battery industry, providing a sure guarantee for total customer satisfaction. Its power is based on the latest innovations in the industry, such as Spiral and AGM technologies, High Performance Calcium batteries for the next generation cars, sealed expanded grid metal calcium technology for cars, trucks and semi - traction applications.

www.winnerbattery.net

MARINE

- Highest quality Calcium technology dual purpose range
- World's best expanded grid metal technology
- Sealed closed type absolute maintenance free
- Excellent discharge resistance and good CCA characteristics
- Dual terminals - State of charge indicator

CYCLOP

- Spiral technology pure lead battery
- Steady high voltage output - high energy density
- Starting types for excellent cranking performance
- Cycling types with excellent deep discharge characteristics

SWITCH FOR SUCCESS

SPRINT

- Calcium technology sealed type range
- Swift cranking performance for passenger car types
- Strong plate design for commercial vehicle types
- Absolutely Maintenance free - Charge indicator
- Long life duration - Low self discharge

SPRINT FREE

- Start / Stop cars approved excellent performance
- AGM VRLA hermetically sealed closed type
- OE quality - Very high number of engine starts
- Higher energy density - Non spillable - Maintenance Free
- Improve fuel efficiency - Eco friendly Save CO₂ emissions

SPRINT HD

- Heavy Duty calcium technology range
- Swift cranking performance under extreme conditions
- Strong plate design - Improved vibration resistance
- Long life duration - Low self discharge

SPRINT SHD

- Sealed type Super Heavy Duty range
- Super Calcium expanded grid Technology
- Silver alloy integrated for types up to 100Ah
- Vibration resistant design - No maintenance
- Excellent solution for EUR4/5/6 commercial vehicles

CLASSIC

- Quality good performance dry charged batteries
- Immediate response - Long life time
- Maintenance free according to DIN
- For every starting application

ADVANCE

- Closed type absolute maintenance free range
- Good cranking performance calcium technology
- Advanced ratio quality to value
- Available only for fast moving types

SOLAR

- Lead - electrolyte semi traction range
- Cycle resistant robust plate design
- For applications of high energy demand
- Tubular plate types included for deep cycling

SOLAR SMF

- Sealed Maintenance Free semi traction range
- Closed type Calcium technology range
- Charging - discharging cycle resistance
- Vibration resistant design - Compact group plate
- For applications of high energy demand

SOLAR FREE

- Cyclic resistant AGM technology range
- Valve regulated lead acid sealed type
- Totally Maintenance free - Long service life
- Thick plates with special alloy for high rate discharge
- Special grids for vibration resistance designed for heavy duty applications

WINNER®

Total Solutions System

WINNER STARTING BATTERIES

Winner is a superior quality product representing the "Total Solutions System", suitable for a wide range of applications. It is characterised by excellent reliability, long life and modern design.

The **Winner** automotive series offers the newest technologies including Spiral, AGM and Calcium Sealed technology with expanded grid metal plates available in a complete range of batteries.

Winner is a result of the company's modern marketing policy, designed to thoroughly examine the customer's needs, and quickly respond to meet new requirements. The product's demand in world markets is a tribute to the over-all quality of the battery and total customer satisfaction.

Winner "Starting Total Solution" covers the needs of every automotive, truck, tractor, motorcycle and boat, light wind and solar applications, golf carts, lighting and marine uses, recreational vehicles, light forklifts, floor cleaning equipment, utility transport vehicles, etc.

PEGASUS

- High performance dry charged Motorcycle battery
- Low maintenance - Very long storage time
- Excellent activation - Package included acid bottle
- Covers all conventional motorcycles with reliability

CENTAURUS

- High cold cranking power Motorcycle battery
- Maintenance free closed type with acid bottle
- Immediate activation - Long service time
- Covers new motorcycles with high reliability

AMAZON

- AGM Technology High Performance Motorcycle battery
- Maintenance free sealed type - Valve regulated
- Low self discharge for long storage time
- Covers all modern motorcycles with high energy demand
